Make Money or get \$100

There are many of ways an industrious individual webmaster can make money online. Countless people have turned to the World-Wide-Web looking for a good money making opportunity they can accomplish from their own homes and computers. It may seem daunting at first but you can make money online if you persevere and take the advice you will find on 1 day SEO and most importantly have the determination and courage to just take the plunge. If your brand new to this, don't give up your day job, but start in a small way at first, a little way down the line... giving up your day job may be a viable option for you if you so wish.

One of the most ingenious ways to supplement or even replace your existing income is through online affiliate programs. Online affiliate programs first sprang up in 1995 when Amazon started paying websites for referring customers to their site. Now the array and choice of products and services to choose from is mind boggling to say the least.

1 day SEO, will attempt to teach you in a variety of ways, how too make money from your website, affiliate marketing being one of them.

Online affiliate programs provide home business professionals and online entrepreneurs a risk-free form of advertising to produce revenue from their websites. Affiliate marketing has become an increasingly popular home based business opportunity for the following reasons:

It can be started with little or no production costs

No employees

No inventory or stock taking

No premises to fork out for

No order processing

No shipping costs or hassle

No customer service

Very limited risk and liability on your part

In their simplest form an affiliate program will:

Give you a unique code for you so, you can get credit for your hits and sales you sent to them.

Links containing your unique affiliate code for you to place on your website/blog or around the net that will lead your surfers to various products and services.

Some provide free content and banners for you to use to entice surfers to click on your unique affiliate link.

Stats. So you can view and track your stats and campaigns.

A nice commission cheque once in a while!!!

Most affiliate programs have their own rules so read them very carefully and don't brake them!

When choosing a sponsor and applying their advertising material to your site, still keep SEO in mind. Remeber that- SE's cannot read java script or frames so if you can dont choose these type of banners or add to many of them to your site, re-name their advertising banners as you save them try to reflect your keywords in the alt. image tags. Remember to apply as much of the SEO info you have learnt to using and including sponsor material on your site as possible.
